Re: Metzeler MH90-21 Tubeless Drag Specialties Part Number 0305-0072
Metzeler 120/70B - 21 Drag Specialties Part Number 110-12893

Dear Dealer:

Our records indicate that you purchased one or more of the above referenced Metzeler tires from us in 2008. We are writing you regarding these tires in the event you applied either of these tires to a Bagger style motorcycle during 2008.

We are advised that the load index rating on the MH90-21 is 54 and for the 120/70/21 it is 62, which are both less than the load index rating of 72 for the original equipment tire for that Harley-Davidson motorcycle. Metzeler has advised us that applying these tires to a Bagger style motorcycle is not recommended and therefore could create a serious safety hazard.

We encourage people to consult the manufacturer's website and latest fitment guide information for recommended fitments and technical data. Metzeler's 2008 "AMERICAN V-TWIN UPGRADE GUIDE" advises that to maintain motorcycle dynamics and load carrying capacity, replacement tires must always have a load index and speed rating that covers the maximum speed and maximum wheel load of the motorcycle. The Metzeler tire guide (part number 9901-0139) is available free of charge with any order from us. The Metzeler website can be found at www.us.metzelermoto.com

If you have any questions concerning this information, please contact us at 800-369-1000. Thank you for your attention to this.

Sincerely,

Julie Hubbard
